SUMMARY

Software engineer with 1.5 years of hands-on experience building web and mobile applications with React, React Native, Flutter, Node.js and TypeScript, including an AI-driven hiring app released on the Google Play Store. Experienced in secure authentication, REST API integration, automated testing and CI pipelines, working with product and backend teams to ship features.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Dart, Python, Java, SQL, C, C++
Frontend & Mobile: React.js, Next.js, React Native (Expo), Flutter, Riverpod, Redux, Context API, HTML5, CSS3, Tailwind CSS
Backend & Databases: Node.js, Express.js, RESTful APIs, JWT Authentication, MongoDB, MySQL, PostgreSQL, SQLite, Firebase
Testing & DevOps: Jest, React Native Testing Library, Supertest, pytest, GitHub Actions, CI/CD, Git, Postman
Core Concepts: SDLC, OOP, Data Structures & Algorithms, DBMS, Secure Coding, Debugging, Technical Documentation

EXPERIENCE

Esbu Solutions Private Limited Jun. 2026 – Sep. 2026
Technical Instructor | *Full Stack Development* Pune, Maharashtra

- Designed and built **full-stack applications from scratch** using React (Vite), Node.js, Express, MongoDB Atlas and REST APIs, implementing CRUD operations, Mongoose models, data validation and JWT authentication
- Prepared **course notes, setup guides and technical documentation** covering React, Node.js, databases, authentication and deployment
- Led practical sessions on **API integration, debugging, testing, Git/GitHub and deployment**, mentoring students through technical issues

Fladdra Technologies Oct. 2024 – Jan. 2026
Software Developer (Apr. 2025 – Jan. 2026); Software Development Intern (Oct. 2024 – Mar. 2025) Pune, Maharashtra

- Developed and maintained **React.js web and React Native (Expo) Android applications** for Career View, an AI-driven hiring platform, and **contributed to building and releasing the app on the Google Play Store**
- Implemented **secure authentication, protected routing, Formik/Yup validation, REST API integration and Redux state management**, building reusable components across end-to-end candidate workflows
- Delivered **AI job recommendations, resume processing, interview question generation**, video recording/uploads, notifications and performance reporting

PROJECTS

Apply Tracker | React Native, Expo, TypeScript, Jest, React Native Testing Library

- Built a **React Native (Expo) app** to track job applications, with a status pipeline, follow-up reminders, search, filters, stats and **offline storage with AsyncStorage**
- Wrote **38 tests with Jest and React Native Testing Library** covering business logic, storage, forms and full user flows; **GitHub Actions CI** runs type checks and tests on every push

Task Manager | React, Node.js, Express, MongoDB, Jest, GitHub Actions

- Built a **full-stack task manager** with JWT authentication, bcrypt password hashing, per-user data isolation, and search, filter and sort APIs
- Wrote **32 API integration tests** with Jest and Supertest on an in-memory MongoDB; set up **GitHub Actions CI** running tests, linting and builds on every push
- Tests caught a **privilege-escalation bug** in registration and a MongoDB aggregation sorting bug; added Helmet, rate limiting and request size limits

AI Pipeline Optimisation | Python, LLMs, pytest, GitHub Actions

- Cut token usage of a **multi-agent LLM pipeline by 97.4%** with context retrieval, prompt compression and agent routing; handled malformed and incorrect outputs with validation and tests

My Music | Flutter, Dart, Riverpod, SQLite, just_audio

- Developed a **cross-platform Flutter music app** (team of two) with Riverpod, a SQLite data layer with migrations, duplicate detection using audio fingerprints and a full player

EDUCATION

Sinhgad Institute of Business Administration and Research (SPPU) 2025 – 2027
Master of Computer Applications (MCA) Pune, Maharashtra

Savitribai Phule Pune University 2022 – 2025
Bachelor of Computer Applications (BCA) Pune, Maharashtra
