SUMMARY

Software engineer with 1.5 years of hands-on experience building web and mobile applications using JavaScript, TypeScript, React, React Native, Flutter and Node.js. Experienced in secure authentication, REST API integration, automated testing and CI pipelines, working with product and backend teams to ship features.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Dart, Java, Python, SQL, C, C++
Frontend & Mobile: React.js, Next.js, React Native (Expo), Flutter, Riverpod, Angular, Redux, Context API, HTML5, CSS3, Tailwind CSS
Backend & Databases: Node.js, Express.js, RESTful APIs, JWT Authentication, MongoDB, MongoDB Atlas, MySQL, SQLite, Firebase
Testing & DevOps: Jest, Supertest, pytest, GitHub Actions, CI/CD, Git, GitHub, Postman
Core Concepts: SDLC, OOP, Data Structures & Algorithms, DBMS, Secure Coding, Debugging, Technical Documentation

EXPERIENCE

Esbu Solutions Private Limited Jun. 2026 – Sep. 2026
Technical Instructor | *Full Stack Development* Pune, Maharashtra

- Designed and built **full-stack applications from scratch** using Vite/React, Node.js, Express, MongoDB Atlas and REST APIs, implementing CRUD operations, Mongoose models, data validation and JWT authentication
- Prepared **course notes, setup guides and technical documentation** covering React, Node.js, databases, authentication and deployment
- Led practical sessions on **API integration, debugging, testing, Git/GitHub and deployment**, mentoring students through technical issues

Fladdra Technologies Oct. 2024 – Jan. 2026
Software Developer (Apr. 2025 – Jan. 2026); Software Development Intern (Oct. 2024 – Mar. 2025) Pune, Maharashtra

- Developed and maintained **React.js web and React Native (Expo) Android applications** for Career View, an AI-driven hiring platform supporting resume analysis, job matching, assessments and mock interviews
- Implemented **secure authentication, protected routing, Formik/Yup validation, REST API integration and Redux state management**, building reusable components across end-to-end candidate workflows
- Delivered features for **AI job recommendations, resume processing, interview question generation, video recording/uploads, notifications and performance reporting**, working with backend and product teams to test, debug and release them

PROJECTS

Task Manager | React, Node.js, Express, MongoDB, Jest, GitHub Actions

- Built a **full-stack task manager** with JWT authentication, bcrypt password hashing, per-user data isolation, and search, filter and sort APIs
- Wrote **32 API integration tests** with Jest and Supertest on an in-memory MongoDB; set up **GitHub Actions CI** running tests, linting and builds on every push
- Tests exposed and fixed a **privilege-escalation bug** in registration and a sorting bug in a MongoDB aggregation; added Helmet, rate limiting and request size limits

AI Pipeline Optimisation | Python, pytest, flake8, GitHub Actions

- Reduced token usage of a multi-agent AI pipeline by **97.4%** (56,244 to 1,455 tokens) using context retrieval, prompt compression and dynamic agent routing
- Simulated and debugged production failures (timeouts, malformed JSON, silent incorrect output) with **documented root-cause analysis** and a CI/CD pipeline with a rollback strategy

My Music | Flutter, Dart, Riverpod, SQLite, just_audio

- Developed a **cross-platform Flutter music app** (team of two) with a feature-based architecture and **Riverpod** state management
- Built a **SQLite data layer with migrations**, metadata-based music import, **duplicate detection using audio fingerprints**, and a player with queue, shuffle and repeat

Smart Library Management System | Python, SQL

- Built a **library management application** with role-based Admin, Librarian and Reader modules, book issue/return tracking and a relational database

EDUCATION

Sinhgad Institute of Business Administration and Research (SPPU) 2025 – 2027
Master of Computer Applications (MCA) Pune, Maharashtra

Savitribai Phule Pune University 2022 – 2025
Bachelor of Computer Applications (BCA) Pune, Maharashtra
